

ABSTRACT

The study was conducted at Kazin's Beach Resort Brgy, Lonoy Sitio Culasi Sopian, Capiz from May 2022 to June 2023. The system was developed at Capiz State University Mambusao Satellite College.

The purpose of this system was to create a Website of Kazin's Beach Resort. Specifically, this study aimed to: develop a website for Kazin's Beach Resort that is convenient and easy to use by Kazin's Beach Resort, design a website that will provide information about Kazin's Beach Resorts, develop a website that will provide sustainable and easy access to the client and respondents to view the services offered, amenities; and determine the acceptability of system in terms of functional suitability maintainability, performance efficiency, compatibility, reliability, usability and portability.

The researchers used Visual Studio Code as a programming language in the design and development of the system, MongoDB for the database.

After the analysis of the current and proposed system, the researchers found out the better system that could make every transaction at Kazin's Beach Resort Brgy, Lonoy Sitio Culasi, Sopian, Capiz easy.
