MISSION

CapSU is committed to advance knowledge and foster innovations; nurture talents, skills and values; engage in high-impact research, promote entrepreneurship, industry collaboration and technology utilization and provide responsible technological development.

GOALS

The University shall have the following goals:

- Effective and efficient management
- Quality Education and quality graduates
- Updated knowledge and developed technologies
- Efficient and sustainable outreach programs
- Improved and profitable production

CapSU MARCH

March on CapSUnians,
Hold on to the dreams of your heart
March on CapSUnians,
And hold high your head
With great pride.

March on CapSUnians,
Persevere in your quest for the truth
Work for quality in service,
Strive for excellence,
Believe in your dreams,

Drink from the fountain of wisdom,
And partake in the banquet of knowledge.
Strengthen your wings,
Spread them a wide and
Soar up high to the skies.

March on CapSUnians,
And hold on to the dreams of your heart.
March on CapSUnians,
And hold on to the dreams of your heart.

CapSU is actively involved in the activities of the Western Visayas Agriculture and Resources Research and Development Consortium (WESVARRDEC). In fact, two key officials of the University are Regional Coordinators in the working committees of the Consortium: Dr. Geronimo L. Gregorio (VP for RDE) is Regional Coordinator of the Research Group while Dr. Cora F. Navarra (Dean, Graduate School) is Regional Coordinator of the Applied Communications Group.

Some of their outputs are articles about CapSU activities in relation to WESVARRDEC programs which are published in the regional newspaper Panay News, and also in the WESVARRDEC website and blogspot as well as in the PCARRD website. Likewise, Dr. Navarra (with Mr. Eduardo Navarra) has written a Farm Primer entitled "Ang Pag-obra kag mga Gamit sang Uling nga Ugabhang (Carbonized Rice Hull)" published by the Philippine Council for Agriculture and Forestry Resources Research and Development (PCARRD). She also has edited two other Farm Primers published by the same council.

CAPSU brings opportunities to OSYs by A. Lumaque

Roxas City (14 May) -- About 300 out-of-school youth (OSY) have graduated from the Mobile Technology School (MTS) since its launching in October 2008 to provide Capiceños with skills for gainful employment.

The mobile school project is a brainchild of CapSU and implemented in collaboration with the Capiz provincial government, Technical Education Skills and Development Authority (TESDA) and Department of Labor and Employment (DOLE).

"This is a core program of CapSU Roxas City Main Campus Community Extension Services Office," said CapSU president Dr. Editha Magallanes.

CESO also undertakes consultancy and technical services, information dissemination and skills training development programs.

The various MTS training courses included Basic Arc Welding, Beauty Care and Cosmetology and Beauty Tips which were designed by CapSU to make education accessible to a wider mass of people.

"Frontliners in the implementation of the program in the different towns and barangays in the province are the faculty of the College of Industrial Technology and Engineering," said an MTS briefer.

The MTS briefer also noted that the program will continue to serve the less privileged individuals this 2010 ? 2011 due to its high demand in the province.

Recently, the state university's aim to help the OSYs has taken another leap as the DOLE is set to turn over livelihood starter kits worth P300,000 to 42 MTS graduates of basic arc welding and beauty care.

"Chosen beneficiaries underwent an orientation and submitted their respective individual business plan and projected income," said DOLE ? Capiz Provincial Head Ricardo P. Monegro. A management team has also been established to monitor and keep track of the project's status and implementation. (PIA)

CapSU Burias holds coconut tree planting

The non-academic personnel of the Capiz State University (CapSU) Burias Campus in Mambusao town planted 137 coconut plantlings across the two-hectare lot of their campus on September 27.

The activity was part of the celebration of the 110th Anniversary of the Philippine Civil Service.

Personnel Officer Emily Launio said the tree planting activity sought to create awareness among their personnel on how they could help address climate change.

Minerva Victoriano, administrative officer at the finance and accounting office, said the activity made her sweat out and exercise thus beneficial to her health.

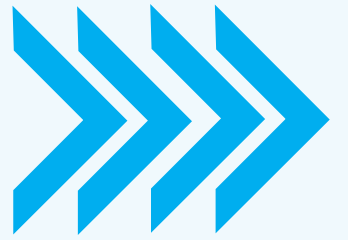

Rex Berganio, a personnel staff, saw the need for employees like him to be conscious of the effects of climate change.

Benjamin Gutierrez, a university research associate, said he is optimistic about the initiative.

It will make the area ultimately productive because the land planted to coconut has been left idle for some time, he said.

Gutierrez, a trained coconut expert, said the monitoring will be done every three months starting from the planting period. During these periodic visits, the personnel will also help out in the cultivation, including fertilization and other maintenance activities.

ACCREDITATION OF ACADEMIC PROGRAMS

2010 turned out to be very challenging on the part of the Capiz State University. Campuses found in the first and second districts did their best to subject their curricular programs for accreditation (November 15-20, 2010 and March 6-8, 2010) and passed the AACUP accreditation for the Level III, Level I and Survey Visits. Congratulations to the administration, faculty, staff, students, alumni and other agencies involved in the linkages of the University.

MEDICAL/DENTAL SERVICES

The University's division for health services is cognizant of its responsibility on the students' health and well-being by providing medical and dental assistance and whenever available, free medicine to students. Incoming freshmen and transferees are required to undergo physical examinations in the University clinic. The University physicians prepare the schedules for medical and dental examinations for all students at least once a year.

For the months of July and August 2010, when Dengue Fever was rampant, students visited the University clinic for treatment and some of them were referred to the hospitals for further medication. Common cases treated in the clinic from March-Dec. 2010 were:

DISEASE/ILLNESS	NO. OF CASES
Acute Gastroenteritis	615
Acute Rensillophanyugitis	217
Allergic Rhinitis	115
Anemia	37
Asthma	46
Conjunctivitis	11

Visible Light Care	3

The University's health services are very functional and operational not only during sports activities of the University like CAPTESA and SCUAA Meet, but also other activities undertaken by the University.

Lecture on filariasis and distribution of anti-filariasis medicines were taken care of by the University physicians, nurses and clinical instructors in cooperation with the City/Municipal Health units.

Film showings on abortion and its effects to everyone was also made available for the awareness of the students.

Nutrition celebration was emphasized to keep everyone healthy and imparted thorough understanding on the nutritive value of foods eaten, particularly the balanced diet for all.

The Medical and Dental Services of the University also engaged in extension services as in:

MEDICAL CONSULTATION (EVERY WEDNESDAY MORNING)	
Adults	215
Pediatric	178

Medical missions with the NGOs took care of the 28 circumcisions, while dental mission with the Capiz LGU and balikbayan group of dentists extended help to the needy.

This simply shows that the University's linkages strengthened the ties of the students, faculty and staff and the community.

Choosing the Best COCO Hybrids using their Physico-chemical Attributes as Indices for Economic Utilization (By: Geronimo L. Gregorio)

The study was conducted at Capiz State University (CapSU), Burias Mambusao, Capiz from January 2010 to June 2010 sought to identify and describe the inherent physico-chemical attributes of mature nuts of hybrid coconut collections at the CapSU coconut plantation as indices for economic and industrial utilization. Eleven bearing hybrids were described in terms of their whole nut, husk, shell, meat and liquid endosperm and also according to their copra, cream and VCO yields. Based on the desirable physico-chemical attributes, these six hybrids (in descending order) most economically important: CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxBAYT, MRDxTACD and MRDxCATD. Based on the nut characteristics of these hybrids. Below are the most recommended economic and industrial uses of the hybrids.

CHARACTERISTICS	RECOMMENDED VARIETIES
Coir. Coir Dust	CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxBAYT
Coconut Meat	CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxTACD
Copra	CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxCATD, MRDxTACD, MRDxBAYT
Grated Coconut	CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxCATD, MRDxTACD
Coconut Milk	CATDxLAGT, MRDxLAGT, MYDxWAT, MYDxTACD, MRDxCATD
Shell for Charcoal	CATDxLAGT, MRDxLAGT, MYDxLAGT, MRDxBAYT, MRDxWAT
Water for Vinegar	CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxTACD, MRDxBAYT
VCO Yield	CATDxLAGT, MRDxLAGT, MYDxWAT, MRDxWAT, MRDxTACD, MRDxCATD
Cream Production	CATDxLAGT, MRDxLAGT, MRDxWAT, MYDxWAT
Varieties with	CATDxLAGT, MRDxLAGT, MRDxLAGT, MYDxWAT, MRDxCATD, MRDxTACD, MYDxWAT
Versatile Uses	MRDxTACD, MRDxBAYT

EXTENSION SERVICES

The University's extension services provide skills trainings to the people in the different municipalities of the province of Capiz. The efforts and commitment of the faculty members and the students from the ten Campuses contributed much to the achievements of the office of the Extension Services.

For 2010, the extension services worked on agricultural and fishery extension; continuing education training and technical/vocational training.

EXTENSION SERVICES

CapSU is actively involved in the activities of the Western Visayas Agriculture and Resources Research and Development Consortium (WESVARRDEC). In fact, two key officials of the University are Regional Coordinators in the working committees of the Consortium: Dr. Geronimo L. Gregorio (VP for RDE) is Regional Coordinator of the Research Group while Dr. Cora F. Navarra (Dean, Graduate School) is Regional Coordinator of the Applied Communications Group.

Some of their outputs are articles about CapSU activities in relation to WESVARRDEC programs which are published in the regional newspaper Panay News and also in the WESVARRDEC website and blogspot as well as in the PCARRD website. Likewise, Dr. Navarra (with Mr. Eduardo Navarra) has written a Farm Primer entitled "Ang Pag-obra kag mga Gamit sang Uling nga Ugabhang (Carbonized Rice Hull)" published by the Philippine Council for Agriculture and Forestry Resources Research and Development (PCARRD). She also has edited two other Farm Primers published by the same council.

CAPSU brings opportunities to OSYs

Roxas City (14 May) -- About 300 out-of-school youth (OSY) have graduated from the Mobile Technology School (MTS) since its launching in October 2008 to provide Capiceños with skills for gainful employment.

The mobile school project is a brainchild of CapSU and implemented in collaboration with the Capiz provincial government, Technical Education Skills and Development Authority (TESDA) and Department of Labor and Employment (DOLE).

"This is a core program of CapSU Roxas City Main Campus Community Extension Services Office," said CapSU president Dr. Editha Magallanes.

CESO also undertakes consultancy and technical services, information dissemination and skills training development programs.

The various MTS training courses included Basic Arc Welding, Beauty Care and Cosmetology and Beauty Tips which were designed by CapSU to make education accessible to a wider mass of people.

"Frontliners in the implementation of the program in the different towns and barangays in the province are the faculty of the College of Industrial Technology and Engineering," said an MTS briefer. The MTS briefer also noted that the program will continue to serve the less privileged individuals due to its high demand in the province.

CapSU has taken another leap as the DOLE is set to turn over livelihood starter kits worth P300,000 to 42 MTS graduates of basic arc welding and beauty care.

"Chosen beneficiaries underwent an orientation and submitted their respective individual business plan and projected income," said DOLE Capiz Provincial Head Ricardo P. Monegro.

A management team has also been established to monitor and keep track of the project's status and implementation. (PIA)

CapSU Burias holds coconut tree planting

The non-academic personnel of the Capiz State University (CapSU) Burias Campus in Mambusao town planted 137 coconut plantlings across the two-hectare lot of their campus last September 27.

The activity was part of the celebration of the 110th Anniversary of the Philippine Civil Service.

Personnel Officer Emily Launio said the tree planting activity sought to create awareness among their personnel on how they could help address climate change.

Minerva Victoriano, administrative officer at the finance and accounting office, said the activity made her sweat out and exercise thus beneficial to her health.

Rex Berganio, a personnel staff, saw the need for employees like him to be conscious on the effects of climate change.

Benjamin Gutierrez, a university research associate, said he is optimistic about the initiative.

It will make the area ultimately productive because the land planted to coconut has been left idle for some time. Gutierrez, a trained coconut expert, said the monitoring will be done every three months starting from the planting period. During these periodic visits, the personnel will also help out in the cultivation, including fertilization and other maintenance activities.
