

ABSTRACT

The Experiment was conducted at the HM Laboratory Room at Capsu Pilar, Campus from May 25-26, 2023 with the following objectives of determining the acceptability of Turmeric Mayonnaise at the different levels based on appearance, aroma, taste, texture and general acceptability and to determine which of the different level of Turmeric Mayonnaise is the most acceptable.

The study revealed that Turmeric Mayonnaise, treatment E got the highest mean in terms of appearance, aroma, taste, texture and general acceptability. Data revealed that the treatment A, B, C and D was very much like. Study revealed that treatment A., (0g turmeric mayonnaise), treatment B, (1g turmeric mayonnaise), treatment C, (1.5g turmeric mayonnaise) treatment D, (2g turmeric mayonnaise) and treatment E (2.5g turmeric mayonnaise) got a mean which is verbally interpreted as Acceptable.
